A:-Narendra Modi
B:-Arun Jaitley
C:-Aravind Panagariya
D:-K. Chandrasekhar
Correct Answer:- Option-C

Question20:-Director of the Malayalam film 'Paadam onnu oru vilaapam'

A:-Aryadan Shoukath
B:-T.V. Chandran
C:-Adoor Gopala Krishnan
D:-A.K. Lohithadas
Correct Answer:- Option-B

Question21:-A commonly used food preservative is

A:-Sodium chloride
B:-Potassium chloride
C:-Sodium benzoate
D:-None of these
Correct Answer:- Option-C

Question22:-The strongest force in nature is

A:-Gravitational force
B:-Nuclear force
C:-Electrostatic force
D:-Elastic force
Correct Answer:- Option-B

Question23:-The value of acceleration due to gravity (g)

A:-increases with height from earth's surface
B:-decreases with height
C:-remains constant with height
D:-none of these
Correct Answer:- Option-B

Question24:-LPG means

A:-Liquid Petrol Gas
B:-Liquid Petroleum Gas
C:-Liquified Petroleum Gas
D:-None of these
Correct Answer:- Option-C

Question25:-Hydraulic lifts used to lift heavy loads works on the principle of

A:-Boyle's law
B:-Charles' law
C:-Avagadro's law
D:-Pascal's law
Correct Answer:- Option-D

Question26:-1 Angstrom (1 A°) = _____ cm.

A:- 10^{-8}
B:- 10^{-10}
C:- 10^{-5}
D:- 10^{-1}
Correct Answer:- Option-A

Question27:-Which among the following is the unit to express the power of lens?

A:-Candela
B:-Angstrom
C:-Diopetre
D:-Watt
Correct Answer:- Option-C

Question28:-1 a.m.u. means

A:- $1/14$ of atomic mass of nitrogen
B:-1 g of hydrogen
C:- $1/12$ of atomic mass of carbon
D:- $1/16$ of atomic mass of oxygen
Correct Answer:- Option-C

Question29:-Sound waves are

- A:-Longitudinal waves
- B:-Transverse waves
- C:-Electromagnetic waves
- D:-None of these

Correct Answer:- Option-A

Question30:-The chemical bonding in carbon tetra chloride is

- A:-Ionic bond
- B:-Co-valent bond
- C:-Double bond
- D:-Triple bond

Correct Answer:- Option-B

Question31:-The people experience blurred near vision when reading, sewing or working at computer due to the loss of elasticity of lense of eye that occurring in middle and old age. This is called

- A:-Glaucoma
- B:-Astigmatism

- D:-Myopia

Correct Answer:- Option-C

Question32:-The part of brain located below the thalamus but just above the brain stem that govern body temperature, thirst, sleep and sex drive called as

- A:-Cerebellum
- B:-Pons
- C:-Cerebrum
- D:-Hypothalamus

Correct Answer:- Option-D

Question33:-Seedling of a plant grow straight upward in dark environment in order to reach the sunlight above the ground but start bending towards light, this is due to

- A:-more growth occurs on dark side
- B:-more growth occurs on light side
- C:-growth is equal on both side
- D:-none of these

Correct Answer:- Option-A

Question34:-Hormone that causes liver to convert stored glycogen into glucose which is released into blood stream when the concentration of glucose in the blood stream falls to low

- A:-Insulin
- B:-Glucagon
- C:-Cortisol
- D:-Calcitonin

Correct Answer:- Option-B

Question35:-Both Culex and Anopheles mosquitoes are the vector for the transmission of disease, the matching pair is

- A:-Anopheles-Filarial worm
- B:-Culex-Plasmodium parasite
- C:-Anopheles-Plasmodium parasite
- D:-Culex-Pneumococcus

Correct Answer:- Option-C

Question36:-Erythroblastosis foetalis occurs due to

- A:-"Rh⁺" mother and "Rh⁻" father
- B:-"Rh⁺" mother and "Rh⁺" father
- C:-"Rh⁻" antibodies of mother and "Rh⁺" blood of child
- D:-"Rh⁻" blood of mother and "Rh⁻" blood of child

Correct Answer:- Option-C

Question37:-Downs syndrome is due to

- A:-44A+XXY
- B:-44A+XY
- C:-45A+XY
- D:-44A+XO

Correct Answer:- Option-C

Question38:-Great reduction in the quantity of lymphocytes that disrupts the proper functioning of immune system. This occurs due to

- A:-AIDS
- B:-Typhoid
- C:-Dengue fever
- D:-Malaria

Correct Answer:- Option-A

Question39:-Archeopterix shows a unique combination of characters of

- A:-Dinosaur and bird
- B:-Dinosaur and crocodile
- C:-Bats and lizard
- D:-Calotus and bird

Correct Answer:- Option-A

Question40:-Organism can pass on characters that is acquired during its life time to its offspring, who gave this idea?

- A:-Darwin
- B:-Hugo De Vries
- C:-Lamarck
- D:-Wallace

Correct Answer:- Option-C

Question41:-All are cause-specific categorization of adverse events following immunization (AEFI) except

- A:-Immunization anxiety related reaction
- B:-Immunization error related reaction
- C:-Unknown reaction
- D:-Vaccine product related reaction

Correct Answer:- Option-C

Question42:-All are true about mass drug administration in filariasis except

- A:-Given to all above 2 years of age except pregnant and seriously ill patients
- B:-Indicated in highly endemic areas
- C:-Given only if the people have microfilaremia or disease manifestations
- D:-At least 80% coverage has to be achieved

Correct Answer:- Option-C

Question43:-Which of these is a live vaccine?

- A:-Pentavalent vaccine
- B:-Measles vaccine
- C:-Tetanus toxoid
- D:-Japanese encephalitis vaccine

Correct Answer:- Option-B

Question44:-A severely malnourished child 6 months to 72 months of age gets the following calories and proteins per day through ICDS programme

- A:-300 cal, 10-12 grams protein
- B:-500 cal, 12-15 grams protein
- C:-800 cal, 20-25 grams protein
- D:-1000 cal, 25-30 grams protein

Correct Answer:- Option-C

Question45:-All the following are vaccine preventable diseases except

- A:-Hepatitis B
- B:-Tuberculosis
- C:-Polio
- D:-Kala azar

Correct Answer:- Option-D

Question46:-Residual sprays used for the control of houseflies in areas of DDT resistance are all except

- A:-Methoxychlor, chlordane
- B:-Fenthion, diazinon
- C:-Dimethoate, malathion
- D:-Ronnell, malathion

Correct Answer:- Option-A

Question47:-All FRUs/CHCs should have

- A:-New born care corner
- B:-Special new born care unit and new born stabilization unit
- C:-New born stabilization unit
- D:-New born care corner and new born stabilization unit

Correct Answer:- Option-D

Question48:-The membrane processes in water treatment are all except

- A:-Reverse osmosis
- B:-Ultra filtration
- C:-Super filtration
- D:-Micro filtration

Correct Answer:- Option-C

Question49:-A disease that is transmitted through contact is called

- A:-infectious disease
- B:-contagious disease
- C:-communicable disease
- D:-endemic disease

Correct Answer:- Option-B

Question50:-What is the route of administration of BCG vaccine?

- A:-Intravenous
- B:-Subcutaneous
- C:-Intradermal
- D:-Intramuscular

Correct Answer:- Option-C

Question51:-Under the National Vitamin A prophylaxis programme, Vitamin A prophylaxis is given to children

- A:-every 6 months upto the age of 5 years
- B:-every 6 months upto the age of 3 years
- C:-only at 9 months of age
- D:-At 9 months and at 18 months of age

Correct Answer:- Option-A

Question52:-Amount of available chlorine in freshly prepared bleaching powder is

- A:-33%
- B:-40%
- C:-25%
- D:-53%

Correct Answer:- Option-A

Question53:-All are warning signs of cancer except

- A:-A lump or hard area in the breast
- B:-Unexplained weight loss
- C:-A persistent change in digestive and bowel habits
- D:-A swelling or a sore that gets better on treatment

Correct Answer:- Option-D

Question54:-Sanitation barrier can best be provided by

- A:-Sanitary latrine
- B:-Disposal pit
- C:-Sanitary latrine and disposal pit
- D:-Sanitary well

Correct Answer:- Option-C

Question55:-The new initiatives launched under the National Health Mission in 2013-15 are all except

- A:-Rashtriya Bal Swasthya Karyakram
- B:-Kishori Shakthi Yojana
