D:-Declaration of Oslo

Correct Answer:- Option-B

Question17:-Accurate method of age estimation of a decomposed body from a single tooth

A:-Gustafson's formula

B:-Karl Pearson's formula

C:-Trotter and Glycer's formula

D:-Ashley's rule of 149

Correct Answer:- Option-A

Question18:-Secondary Centre of ischial tuberosity appeared by

A:-14th year

B:-16th year

C:-19th year

D:-9th month of intra uterine life

Correct Answer:- Option-B

Question19:-Corpus delecti is

A:-Physical body of the victim

B:-The body of the offence

C:-The essence of the crime

D:-Both 2 and 3 are correct

Correct Answer:- Option-D

Question20:-In India importing a foreign girl for illicit intercourse is considered if her age is below

A:-18 years

B:-15 years

C:-12 year

D:-21 years

Correct Answer:- Option-D

Question21:-KROGMAN's formula is related to

A:-Stature

B:-Age

C:-Sex

D:-Race

Correct Answer:- Option-C

Question22:-Which of the following is not correct regarding somatic death ?

A:-Reflex nervous activity may persist

B:-Unconscious

C:-Unable to appreciate any sensory stimuli

D:-None of the above

Correct Answer:- Option-D

Question23:-Correct about brain stem death.

- i. Vast majority suffer cardiac arrest within 48-72 hours.
- ii. Irreversibly comatose.
- iii. Patient is 'dead' in somatic sense.

A:-i and ii

B:-ii and iii

C:-i and iii

D:-All of the above

Correct Answer:-**Question Cancelled**

Question24:-Which of the following produce brownish red postmortem staining ?

A:-Cyanide

B:-Aniline

C:-Carbon monoxide

D:-Barbiturate

Correct Answer:- Option-B

Question25:-Prinsloo and Gorden artefact is seen at

A:-Paravertebral area of lungs

B:-Oesophagus at the level of larynx

C:-Posterior surface of heart

D:-Spine at the level of T5

Correct Answer:- Option-B

Question26:-Most common site of tertiary impact injuries is

A:-Pelvis

B:-Head

C:-Thorax

D:-Abdomen

Correct Answer:- Option-B

Question27:-Sommers movements are explained by

A:-Adipocere formation

B:-Rigor mortis

C:-Mummification

D:-Algor mortis

Correct Answer:- Option-B

Question28:-Which of the following is incorrect about cadaveric spasm ?

A:-Gradual development

B:-Involvement of one group of muscles

C:-Planted weapon

D:-None of the above

Correct Answer:- Option-A

Question29:-Greenish discolouration of right iliac fossa in decomposed body is due to

A:-Methaemoglobin

B:-Sulphaemoglobin

C:-Carbaminohaemoglobin

D:-Carboxyhaemoglobin

Correct Answer:- Option-B

Question30:-Maggots hasten putrefaction due to

A:-Voracious appetite

B:-Proteolytic enzymes

C:-Both 1 and 2

D:-Marbling

Correct Answer:- Option-C

Question31:-Which of the following decompose in hours after death ?

A:-Brain

B:-Adrenal medulla

C:-Prostate

D:-Lungs

Correct Answer:- Option-B

Question32:-Waxy substance of adipocere formation is due to all except

A:-Oxygenation of fat

B:-Hydrolysis of fat

C:-Hydrogenation of fat

D:-Saturation of fat

Correct Answer:- Option-A

Question33:-Which is correct about La facies sympathique ?

A:-Seen in strangulation

B:-Pressure on both sympathetic and parasympathetic nerves

C:-One eye open with its pupil constricted

D:-Seen in some cases of hanging

Correct Answer:- Option-D

Question34:-Simon's haemorrhage is seen in

A:-Body suspended for long time

B:-Body is brought down shortly after suspension

C:-In long drops

D:-None of these

Correct Answer:-**Question Cancelled**

Question35:-Cellophane test is based on

A:-Locard's principle

B:-Hasse's rule

C:-Puppe's rule

D:-Wallace's rule

Correct Answer:- Option-A

Question36:-Cafe coronary is

A:-Gagging

B:-Lynching

C:-Choking

D:-Burking

Correct Answer:- Option-C

Question37:-Which of the following will not cause death due to asphyxia ?

A:-Diphtheria

B:-Acute bronchitis

C:-Acute pneumothorax

D:-Pertussis

Correct Answer:-**Question Cancelled**

Question38:-Correct about internal findings of drowning

A:-Absence of water in stomach excludes drowning

B:-Haemorrhage in middle ear is diagnostic

C:-Water can be aspirated from internal ear

D:-All of the above

Correct Answer:- Option-B

Question39:-All of the following statements are correct except

A:-In Diatom test, if both the medium and bone marrow contain same type of

diatom, it is conclusive of death due to drowning in that medium.

B:-Second degree burns produce scars

C:-Third degree burns extremely painful

D:-Scarring occurs after healing of third degree burns

Correct Answer:- Option-C

Question41:-Calculate the volume of fluid to be infused within first 4 hours to a 60 kg female sustained burns involving 40% of total body surface area using Muir and Barclay formula.

A:-2400 milliliters

B:-1200 milliliters

C:-600 milliliters

D:-3200 milliliters

Correct Answer:- Option-B

Question42:-Incorrect about burns

A:-Increased release of free radicals and proteases

B:-Increased permeability of blood vessels

C:-Decreased oncotic pressure in the tissue spaces

D:-Passage of solutes from blood vessels to the extravascular space

Correct Answer:- Option-C

Question43:-Ulcer which develops in gastroduodenum as early as five hours after burns

A:-Cushing's ulcer

B:-Curling's ulcer

C:-Decubitus ulcer

D:-Burrowing ulcer

Correct Answer:- Option-B

Question44:-Heat hematoma resembles

A:-Subdural haemorrhage

B:-Extradural haemorrhage

C:-Subarachnoid haemorrhage

D:-Intraventricular haemorrhage

Correct Answer:- Option-B

Question45:-Autopsy on victims of sunstroke will reveal all except

A:-Degeneration in neurons

B:-Degeneration in myocardium

C:-Adrenal haemorrhage

D:-Emphysematous lung

Correct Answer:- Option-D

Question46:-Treatment of heat cramps all except

A:-Massage of muscles

B:-Plain water

C:-Saline

D:-Move to air conditioned area

Correct Answer:- Option-C

Question47:-Frost nips are seen in all except

A:-Eyes

B:-Ears

C:-Nose

D:-Tip of fingers

Correct Answer:- Option-A

Question48:-Black gun powder consists of all the following except

A:-Lead

B:-Sulphur

C:-Charcoal

D:-Potassium nitrite

Correct Answer:- Option-A

Question49:-One entrance wound but two bullets in the body, such bullets are called

A:-Tandem bullet

B:-Ricochet bullet

C:-Souvenir bullet

D:-Test bullet

Correct Answer:- Option-A

Question50:-Crescentic abrasions of throttling are

A:-Pressure abrasion

B:-Friction abrasion

C:-Scratches

D:-Grazes

Correct Answer:- Option-C

Question51:-Abraded contusions are

A:-Scratches

B:-Grazes

C:-Pressure abrasions

D:-None of the above

Correct Answer:- Option-D

Question52:-'Holographic will' is written by

A:-Testator

B:-Lawyer

C:-Psychiatrist

D:-Manager appointed by the court

Correct Answer:- Option-A

Question53:-Section/s of Indian Penal Code dealing with criminal responsibility is/are

i. Sec. 83

ii. Sec. 84

iii. Sec. 85

iv. Sec. 86

A:-i

B:-ii

C:-Both i and ii

D:-Both iii and iv

Correct Answer:-**Question Cancelled**

Question54:-A person sees a coil of rope in darkness and thinks it as snake. This is known as

A:-Delusion

B:-Hallucination

C:-Illusion

D:-Delirium

Correct Answer:- Option-C

A:-i and ii

B:-i and iii

C:-ii and iii

D:-i, ii and iii

Correct Answer:- Option-B

Question58:-Karl Pearson's formula is used to find out

A:-Age

B:-Race

C:-Stature

D:-Sex

Correct Answer:- Option-C

Question59:-Preservative used in blood sample collected during postmortem for DNA analysis

A:-EDTA

B:-Sodium chloride

C:-Sodium flouride

D:-Formalin

Correct Answer:- Option-A

Question60:-Features of unrespired lung are all except.

A:-Floats in water

B:-Alveolar sacs are dilated

C:-Weight is $1/70^{th}$ of body weight

D:-Spongy and crepitant

Correct Answer:-**Question Cancelled**

Question61:-Calculate the age of foetus in months if crown-heel length is 30 cm.

A:-4

B:-5

C:-6

D:-7

Correct Answer:- Option-C

Question62:-Colostrum can be expressed from breast as early as _____ month of pregnancy.

A:-First

B:-Second

C:-Third

D:-Fourth

Correct Answer:- Option-C

Question63:-All are features of parous uterus, except

A:-Body of the uterus has twice the length of Cervix

B:-Uterine cavity is wide and round

C:-Fundus and broad ligament are at the same level

D:-Internal os is not well defined

Correct Answer:- Option-C

Question64:-Quad hanc is related to

A:-Drugs

B:-Psychic cause

C:-Diabetes Mellitus

D:-Absence of penis

Correct Answer:- Option-B

Question65:-Sterility in males may be caused by

A:-LSD abuse

B:-Myxoedema

C:-Addison's disease

D:-All the above

Correct Answer:- Option-D

Question66:-Penal provisions relating to criminal abortion are all except

A:-Sec. 310 IPC

B:-Sec. 312 IPC

C:-Sec. 314 IPC

D:-Sec. 316 IPC

Correct Answer:- Option-A

Question67:-Foetus is considered to be viable when it attains the intrauterine age of

A:-180 days

B:-190 days

C:-200 days

D:-210 days

Correct Answer:- Option-D

Question68:-Skin slippage is seen in macerated foetus as early as

A:-6 hours after death

B:-10 hours after death

C:-12 hours after death

D:-16 hours after death

Correct Answer:- Option-C

Question69:-Species identification of seminal stains can be done by

A:-Florence test

B:-Barberio test

C:-Creatine phosphokinase test

D:-Precipitin test

Correct Answer:- Option-D

Question70:-Minimum punishment for the offence of rape in India is imprisonment for

A:-2 years

B:-4 years

C:-7 years

D:-14 years

Correct Answer:-**Question Cancelled**

Question71:-'Vishakha guidelines' are related to

A:-Sexual harassment at work place

B:-Showing pornography

C:-Physical contact and advance

D:-All the above

Correct Answer:- Option-D

Question72:-Sexual satisfaction obtained by rubbing the private parts to another person is

A:-Triolism

B:-Undinism

C:-Frotteurism

D:-Scotophilia

Correct Answer:- Option-C

Question73:-Presence of human spermatozoa in the vagina/anal canal of animal is evidence of

A:-Bestiality

B:-Sadism

C:-Fetichism

D:-Eonism

Correct Answer:- Option-A

Question74:-Hegar's sign is related to

A:-Pregnancy

B:-Still born foetus

C:-Dead born foetus

D:-None of the above

Correct Answer:- Option-A

Question75:-Which of the following statement is/are correct about the Homoeopathy Central Council Act, 1973 ?

i. The President of the Central Council shall hold office for a term of three years from the date of his election or nomination, as the case may be, or until his successor shall have been duly elected or nominated, whichever is longer.

Correct Answer:- Option-D

Question77:-Clinical features of Jimson weed poisoning include

A:-Increased salivation

B:-Cornpicker's pupil

C:-Sour taste in mouth

D:-Bradycardia

Correct Answer:- Option-B

Question78:-"Candyflipping" refers to intentional combination of

A:-MDMA with LSD

B:-MDMA with Cocaine

C:-MDMA with GHB

D:-MDMA with 2-CB

Correct Answer:- Option-A

Question79:-The differential diagnosis of strychnine poisoning includes

A:-Meningitis

B:-Isoniazid poisoning

C:-Phencyclidine poisoning

D:-All of these

Correct Answer:- Option-D

Question80:-All are hallucinogenic indolealkylamines (IAAs) except

A:-Lysergic acid diethylamide

B:-Harmine

C:-Mescaline

D:-Psilocin

Correct Answer:- Option-C

Question81:-True statement about toxalbumins

A:-It is a ribosome inactivating protein (RIP) and are of 2 types.

B:-Ricin is a type 2 ribosome-inactivating protein.

C:-Type 2 RIP is composed of only A chain that binds to cell surface.

D:-One A chain molecule can inactivate 100 ribosomes per minute.

Correct Answer:- Option-B

Question82:-Which segment of nephron is affected by Non-steroidal anti-inflammatory drugs (NSAIDs) ?

A:-Papilla

B:-Distal collecting tubules

C:-Glomerulus

D:-Proximal collecting tubules

Correct Answer:- Option-A

Question83:-Toxic principles in white oleander includes

- A:-Cerberin and Nerifolin
- B:-Ruvoside and Thevetin A
- C:-Oleandrin and Rosagenin
- D:-Both 1 and 2

Correct Answer:- Option-C

Question84:-Clinical features of Aconite poisoning include all except

- A:-Ataxia
- B:-Tingling and numbness of mouth and lips
- C:-Blurring of vision
- D:-Constipation

Correct Answer:- Option-D

Question85:-All of the following drugs produces mydriasis except

- A:-Antihistamines
- B:-Carbon monoxide
- C:-Clonidine
- D:-Cyanide

Correct Answer:- Option-C

Question86:-Absorption of alcohol is decreased

- A:-In novice drinkers
- B:-When alcohol concentration of the drink is between 10% and 20%
- C:-When alcohol is taken along with parasympathomimetic drugs
- D:-Both 2 and 3

Correct Answer:- **Question Cancelled**

Question87:-All are characteristic features of a poisonous snake except

- A:-Stout body with abruptly tapering tail
- B:-Fourth infra labial scale is larger than others on either side
- C:-Arrow mark or bird foot mark on the centre of head
- D:-Belly scales that do not cover entire breadth of the belly

Correct Answer:- Option-D

Question88:-All are true about management of Copper poisoning except

- A:-Activated charcoal is contraindicated.
- B:-Gastric lavage with 1% potassium ferrocyanide has limited value.
- C:-Hemodialysis is effective.
- D:-Liver transplantation in hepatic failure.

Correct Answer:- Option-C

Question89:-All are correct statement about antidote for opium poisoning except

A:-Naloxone is very effective against buprenorphine.

B:-Naltrexone is long acting opiate antagonist which can be given orally.

C:-Nalmefene has longer duration of action than naloxone in acute opiate poisoning.

D:-Nalmefene can be given intramuscularly.

Correct Answer:- Option-A

Question90:-Which of the following statement is/are correct regarding quantitative assays used in toxicology ?

i. Atomic Absorption Spectrophotometry is highly complex, costly and best method for accurately detecting inorganic elements using a small sample of blood.

ii. Neutron Activation Analysis is a highly sophisticated method of detection of inorganic elements at levels well below the limits of conventional analytical techniques.

iii. Inductively Coupled Plasma Atomic Emission Spectroscopy is a newer technique that allows simultaneous multi-element analysis. Seventeen elements can be measured from a single sample.

A:-Only (i and ii)

B:-All of these (i, ii and iii)

C:-Only (ii and iii)

D:-Only (i and iii)

Correct Answer:-**Question Cancelled**

Question91:-According to the Drugs and Cosmetic Act 1940, a drug shall be deemed to be adulterated if

A:-It is so coloured, coated, powdered or polished that damage is concealed or if it is made to appear of better or greater therapeutic value than it really is.

Correct Answer:-**Question Cancelled**

Question97:-Which of the following statement is/are correct about war gases and riot control agents ?

- i. Vesicants are cytotoxic alkylating compounds.
- ii. Acrolein as principal lacrimator used in world wars.
- iii. Chloropicrin is 10 times more toxic asphyxiant than chlorine.
- iv. Diphenylcyanoarsine is a sternutator.

A:-Only (iii and iv)

B:-Only (i, ii and iii)

C:-Only (i, ii and iv)

D:-All the above (i, ii, iii and iv)

Correct Answer:- Option-C

Question98:-What is percentage of loss of earning capacity if thumb of one hand is lost according to the Workmen Compensation Act, of 1923 ?

A:-10%

B:-20%

C:-30%

D:-40%

Correct Answer:- Option-C

Question99:-Match the antidotes with their specific indication in the table given below :

Antidote	Indication
i. Flumezenil	a. Botulism
ii. Guanidine	b. Methanol
iii. DMPS	c. Benzodiazepine
iv. Fomepizole	d. Arsenic

A:-i-b, ii-d, iii-a, iv-c

B:-i-b, ii-a, iii-d, iv-c

C:-i-b, ii-a, iii-c, iv-d

D:-i-c, ii-a, iii-d, iv-b

Correct Answer:- Option-D

Question100:-All are characteristic features of thallium triad except

A:-Skin rash and alopecia

B:-Thrombocytopenia and leukocytosis

C:-Painful peripheral neuropathy

D:-Mental confusion and lethargy

Correct Answer:- Option-B
